1. Oil the blade with 6 drops of oil as shown in the picture

2. Attach to clipper and run for a few seconds. Wipe off excess oil.

3. Swap the blade with another if clipping for long periods. This prevents the blade getting too hot.

4. To clean the blade run in a bath of bladewash or white spirit. Then wipe off the excess.

5. Re-apply clipper oil NOT clipper spray. Store in a clean dry environment.
